

ETMC ORTHOPEDIC INSTITUTE

Keeping East Texans in Motion

The ETMC Orthopedic Institute brings together the full spectrum of resources needed to help keep active East Texans in motion.

The ETMC Orthopedic Institute was founded with the goal of consolidating a wide range of orthopedic healthcare services, including treatment for all bones and joints and diseases of the skeletal system.

The ETMC Orthopedic Institute serves as a central resource for East Texans who have problems with their joints, tendons and bones. We work especially closely with trauma services offered by the region's only Level I trauma center, located at ETMC Tyler.

Primary care physicians across the region count on our specialized services as they make referrals. Through outreach and clinics, we practice the ETMC philosophy of bringing excellent healthcare services wherever they're needed in East Texas. We foster excellence as we care for patients, conduct research through FDA studies, and network with other physicians and the specialty services offered within the ETMC healthcare system.

ETMC ORTHOPEDIC INSTITUTE FEATURES

- Advanced in-house orthopedic and hand therapy services
- A dedicated on-site durable medical equipment specialist
- Bilingual staff throughout the clinic
- On-site occupational/family practice medicine physicians
- 24-hour Level I trauma orthopedic services
- Sports medicine clinics

OUR FELLOWSHIP-TRAINED ORTHOPEDIC SURGEONS SPECIALIZE IN A VARIETY OF PROCEDURES:

- Minimally invasive surgery
- Sports medicine and treatment of athletic injuries
- Arthroscopic surgery for shoulder, elbow, wrist, hip, knee and ankle
- Cartilage repair and grafting
- Comprehensive management of arthritis
- Total joint replacement surgery including shoulder, elbow, hand, hip, knee and ankle
- Non-invasive Orthotripsy procedure to treat "tennis elbow" and "heel spurs"
- Complex fracture care and reconstructive techniques following trauma or infection
